SUMMARY

Software engineer with 3+ years building and operating cloud infrastructure and automation across **AWS**, **Azure**, and GCP. Hands-on with Infrastructure as Code (**Terraform**, OpenTofu, HCL), **CI/CD** pipelines in **GitHub Actions**, **Docker** and **Kubernetes**, and multi-distro Linux tooling; automated cloud governance, migrations, and release workflows to cut manual effort and harden reliability. Core contributor to four open-source cloud-infrastructure products (9,300+ GitHub stars, 120+ merged pull requests).

TECHNICAL SKILLS

IaC & DevOps: Terraform, OpenTofu, HCL, Docker, Kubernetes (working knowledge; collaborate with platform teams), GHCR, GitHub Actions (CI/CD), Git, Jira

Cloud & Serverless: AWS (EC2, Lambda, RDS, S3, SecurityHub, GuardDuty, ControlTower, Shield), Azure (Event Grid), GCP, OCI

Languages & Scripting: Go, Python, Bash, SQL, HCL, TypeScript, JavaScript

Databases & Search: MongoDB, PostgreSQL, MySQL, DuckDB, Redis, Elasticsearch (full-text search)

Security & Compliance: CIS (AWS, Azure, GCP, M365, GitHub, Google Workspace), NIST, HIPAA, PCI DSS v4, SOC 2, FedRAMP; IAM, RBAC, cloud security policies

Observability: Datadog, OpenTelemetry (OTel); metrics, logging, tracing, incident triage

WORK EXPERIENCE

Turbot HQ, Inc. Remote

August 2022 – April 2026

Multi-cloud security, governance, and compliance software; makers of the open-source Steampipe / Powerpipe / Flowpipe / Tailpipe suite and the commercial Turbot Guardrails PSPM platform. Remote-first.

Software Engineer I

- Designed and developed an internal REST API microservice in Go using the Gin framework to power the backend of Turbot Guardrails, a Preventive Security Posture Management (PSPM) SaaS product; secured endpoints with JWT client-token authentication, containerized with **Docker**, and deployed to **AWS** EC2.
- Authored multi-cloud compliance modules in HCL + SQL covering 1,000+ resource checks across CIS (**AWS** v4–v6, **Azure** v2.1–v4.0, GCP v3–v4, Microsoft 365, Google Workspace, GitHub), NIST, HIPAA, PCI DSS v4, SOC 2, and FedRAMP frameworks, orchestrating infrastructure checks across **AWS**, **Azure**, and GCP — cutting enterprise compliance-audit time 50%.
- Built a Claude Code skill automating code refactoring, **Terraform**-driven integration testing, and deployment; used it to migrate 35+ **Azure** cloud-governance modules from polling to a push-based, event-driven model via **Azure** Event Grid, cutting resource-discovery latency 70–90% and eliminating recurring **Azure** API throttling.
- Owned release engineering for four open-source Go CLIs (Steampipe, Powerpipe, Flowpipe, Tailpipe) — unified **GitHub Actions** CI/CD release/version workflows, automated Slack release notifications, and GHCR **Docker** image tagging.
- Added multi-distro Linux smoke tests (ephemeral environments across CentOS, Ubuntu ARM64, macOS) to the **GitHub Actions** release pipeline, hardening release safety and catching regressions before deployment.
- Resolved a production incident by diagnosing a Go service stuck in a **Kubernetes** CrashLoopBackOff, coordinating with the platform team to investigate pod logs and status and restore service — reinforcing system resiliency.

Kredey

2021

Full-Stack Website Developer (Intern)

- Used **Elasticsearch** to support full-text and semantic search over a NoSQL Firebase-backed document-sharing platform.

EDUCATION

University of Engineering & Management (UEM) Kolkata, WB, IN

August 2019 – May 2023

Bachelor of Technology in Computer Science and Engineering

CGPA: 9.28

Relevant Coursework: Shell Scripting in Linux, Data Structures and Algorithms, DBMS, Low-Level Design, High-Level Design
