SUMMARY

Gen AI Specialist with 3.5+ years of experience and expertise in **Python**, **large language models (LLMs)**, **prompt engineering**, and multi-cloud platforms (**AWS**, **Azure**, **GCP**). Built a Model Context Protocol server and multi-agent **LLM automation** at Turbot HQ that cut **Azure** resource-discovery latency 70-90% and gave enterprise teams real-time AI-driven access to cloud security data.

TECHNICAL SKILLS

Languages: Python, Go, Bash, SQL, TypeScript, JavaScript (ES6+)

Generative AI & Agentic Engineering: Large Language Models (LLMs), Prompt Engineering, Retrieval-Augmented Generation (RAG), Model Context Protocol (MCP), OpenAI Agents SDK, Pydantic AI, Multi-Agent Systems, Agentic Workflows, Logfire (LLM observability)

Cloud Platforms: AWS (Lambda, EC2, S3, SecurityHub, GuardDuty), Azure, GCP, OCI

Observability & Monitoring: Datadog, OpenTelemetry (OTel), Logfire; metrics, logging, tracing, incident triage

Containers & CI/CD: Docker, Kubernetes (working knowledge), GitHub Actions CI/CD, Git

Messaging & Event-Driven: Apache Kafka (consumer groups, DLQs), AWS SNS/SQS, AWS EventBridge, Azure Event Grid

Databases: PostgreSQL, MySQL, DuckDB, MongoDB, Redis (ElastiCache)

Testing & Quality: Unit Testing, Integration Testing, Automated CI Testing, Code Review

WORK EXPERIENCE

Turbot HQ, Inc. Remote

August 2022 – April 2026

Software Engineer I

- Built the Steampipe Model Context Protocol (MCP) server end to end in **Python**, giving **large language models (LLMs)** standardized, real-time access to enterprise cloud and security data for retrieval and analysis.
- Designed a multi-agent workflow on the **OpenAI** Agents SDK, applying **prompt engineering** to orchestrate **LLM** agents that generate cloud preventive-policy commands, validate and test them in a live environment, self-correct failures, and score outcomes against an internal evaluation metric.
- Built a RAG-based Pydantic AI agent to preprocess and index internal documentation and code as text data into S3 vector storage; deployed it to **AWS** Lambda and integrated it with the Slack Bot API for instant developer query resolution.
- Authored an **LLM**-driven Claude Code skill automating code refactoring, unit test generation, deployment, and PR creation; used it to migrate 35+ **Azure** cloud-governance modules from polling to push-based eventing via **Azure** Event Grid, cutting resource-discovery latency 70–90% and eliminating recurring **Azure** API throttling.
- Engineered core features for Tailpipe, a Go-based observability/SIEM CLI on DuckDB + Parquet, lifting log-processing throughput 30% to 1,000+ logs per second by chunking and batching file reads and streaming writes to DuckDB; reduced memory use to eliminate out-of-memory failures.
- Resolved a production **incident** by diagnosing a Go service stuck in a **Kubernetes** CrashLoopBackOff, collaborating with the platform team to investigate pod logs and status and restore service.
- Added multi-distro Linux smoke tests to the GitHub Actions **CI/CD** release pipeline for four open-source Go CLIs, hardening release safety and catching regressions across Linux distributions before deployment.

PROJECTS

General-Purpose AI Chatbot / Agent (Model Context Protocol) (Jun 2025 – Aug 2025)

Agentic chatbot/agent framework built with Pydantic AI featuring configurable external MCP servers via a persistent MongoDB-backed registry, JSON config loader with strict input validation, per-server failure isolation, native tool calling, mid-conversation multi-model switching (**OpenAI**, Gemini, Anthropic, Mistral), conversation-history persistence, sync + streaming output, prompt-injection safeguards, and Logfire observability.

CIS Benchmark → Compliance Dashboard Generator

Python CLI that automates compliance-dashboard authoring for a multi-cloud governance product. Preprocesses CIS benchmark XLSX workbooks (**AWS**, **Azure**) as text data and emits ready-to-deploy HCL dashboard config plus markdown docs. OOP resource model, custom HCL pretty-printer, openpyxl + pandas, distributed as a pip-installable package.

EDUCATION

University of Engineering & Management (UEM) Kolkata, WB, IN

August 2019 – May 2023

Bachelor of Technology in Computer Science and Engineering

CGPA: 9.28

Relevant Coursework: Object-Oriented Programming, DBMS, Data Structures and Algorithms, Shell Scripting in Linux, Low-Level Design, High-Level Design
