SUMMARY

Implementation Engineer, TPRM with 3.5+ years of experience and expertise in **REST API** integrations, **Python** and **Node.js** scripting, workflow **automation**, and GRC/compliance frameworks (**SOC 2**, **NIST**, **PCI DSS**). Built and owned multi-cloud compliance modules covering 1,000+ resource checks for enterprise customers in finance, healthcare, and government at Turbot HQ, cutting compliance-audit time 50%.

TECHNICAL SKILLS

Languages: Go, Python, TypeScript, JavaScript (ES6+), SQL, Bash, HCL

Backend & API Integrations: REST API design & integration, gRPC, OAuth 2.0 (Auth0), JWT authentication, Node.js, Express.js, Gin, Microservices

Integration & Automation: Webhooks, Apache Kafka (consumer groups, DLQs), AWS SNS/SQS, AWS EventBridge, Azure Event Grid, scripting-based automation, data migration

GRC & Compliance: SOC 2, NIST (incl. 800-171 Rev 2), HIPAA, PCI DSS v4, FedRAMP, CIS (AWS, Azure, GCP, M365, GitHub, Google Workspace); IAM, RBAC, cloud security policies, risk scoring, approval workflows

Cloud Platforms: AWS (Lambda, EC2, S3, SecurityHub, GuardDuty, ControlTower), Azure, GCP

DevOps & Version Control: Docker, GitHub Actions, Git, Terraform, OpenTofu

Databases & Data Handling: PostgreSQL, MySQL; jsonb, CTEs, query tuning, prepared statements, database migrations

Testing & Quality: Unit Testing, Integration Testing, Automated CI Testing, Code Review

WORK EXPERIENCE

Turbot HQ, Inc. Remote

August 2022 – April 2026

Software Engineer I

- Designed and developed an internal **REST API** microservice in Go using the Gin framework to power the backend of Turbot Guardrails, a Preventive Security Posture Management (PSPM) SaaS product; secured endpoints with **OAuth 2.0** authentication via Auth0, containerized with **Docker**, deployed to AWS EC2, and served as a gRPC client for several internal microservices.
- Built a Kafka-based, fire-and-forget event-driven integration pipeline for Turbot Guardrails, where consumers asynchronously processed policy-enforcement events and fired a **webhook** once a policy was successfully enforced against a resource; added a dead-letter queue (DLQ) to capture recurring failures for manual investigation and debugging.
- Built configurable governance workflows extending Guardrails with rule builders, a scoring engine, and approval/prevention policies (branch protection, workflow permissions, runner access, dependency restrictions, MFA, commit-author rules) — the same rule-builder/risk-scoring/approval-workflow pattern TPRM platforms use for vendor assessments and risk scoring.
- Authored multi-cloud compliance modules in HCL + SQL covering 1,000+ resource checks across CIS (AWS, Azure, GCP, Microsoft 365, Google Workspace, GitHub), **NIST**, HIPAA, **PCI DSS v4**, **SOC 2**, and FedRAMP frameworks — used by enterprise customers in finance, healthcare, and government — cutting enterprise compliance-audit time 50%.
- Led the AWS SDK for JavaScript v2 to v3 migration across 180+ call sites and 11+ AWS services in production **Node.js** Lambdas; reduced policy-code duplication ~60% via Nunjucks templating **automation**, keeping the platform supported past AWS SDK v2 EOL.

PROJECTS

CIS Benchmark → Compliance Dashboard Generator

Python CLI that automates compliance-dashboard authoring for a multi-cloud governance product — a reusable technical asset for customer-facing compliance reporting. Ingests CIS benchmark XLSX workbooks (AWS, Azure) and emits ready-to-deploy HCL dashboard config plus markdown docs. OOP resource model, custom HCL pretty-printer, openpyxl + pandas, distributed as a pip-installable package.

EDUCATION

University of Engineering & Management (UEM) Kolkata, WB, IN

August 2019 – May 2023

Bachelor of Technology in Computer Science and Engineering

CGPA: 9.28

Relevant Coursework: Object-Oriented Programming, DBMS, Data Structures and Algorithms, Shell Scripting in Linux, Low-Level Design, High-Level Design
