SUMMARY

Software Development Engineer III (Backend) with 3.5+ years of experience and expertise in **TypeScript/Node.js**, **RESTful APIs** and **microservices**, **distributed systems**, and scalable backend architecture. Led the **AWS** SDK for JavaScript v2 to v3 migration across 180+ call sites and 11+ **AWS** services in production **Node.js** Lambdas at Turbot HQ, cutting policy-code duplication ~60% while keeping systems supported past **AWS** SDK v2 end-of-life.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Go, Python, Java, SQL, Bash

Backend & APIs: REST, Microservices, gRPC, Node.js, Express.js, OAuth 2.0 (Auth0), JWT

Distributed Systems & Messaging: Distributed Systems, Event-Driven Architecture, message queue systems (Apache Kafka — consumer groups, DLQs; AWS SNS/SQS), AWS EventBridge

Databases & Caching: PostgreSQL, MySQL, MongoDB, DuckDB, Redis (ElastiCache), Elasticsearch; jsonb, CTEs, query tuning, schema design, database migrations

Cloud & Containers: AWS (Lambda, EC2, S3, SecurityHub, GuardDuty, ControlTower, Shield, X-Ray, Comprehend, Pinpoint, RAM, EFS), GCP, Docker, Kubernetes (working knowledge; collaborate with platform teams)

Observability: Datadog, OpenTelemetry (OTel); metrics, logging, tracing, incident triage

DevOps & Testing: GitHub Actions, CI/CD, Git, Unit Testing, Integration Testing, Code Review

WORK EXPERIENCE

Turbot HQ, Inc. Remote

August 2022 – April 2026

Software Engineer I

- Led the **AWS** SDK for JavaScript v2 to v3 migration across 180+ call sites and 11+ **AWS** services (SecurityHub, CloudWatch, ControlTower, Shield, Comprehend, Pinpoint, RAM, X-Ray, EC2, EFS) in production **Node.js** Lambdas; reduced policy-code duplication ~60% via templating, keeping the platform supported past **AWS** SDK v2 EOL.
- Built a **Kafka**-based, **event-driven** distributed pipeline where consumers asynchronously processed policy-enforcement events; added a dead-letter queue (DLQ) for reliable failure handling and reprocessing.
- Designed and developed an internal REST API microservice in Go using the Gin framework as part of a greenfield build of Turbot Guardrails, a high-scale **SaaS** platform; secured endpoints with OAuth 2.0 authentication via Auth0, containerized with **Docker**, deployed to **AWS** EC2, and served as a gRPC client for several internal distributed **microservices**.
- Optimized complex PostgreSQL queries powering customer compliance audits — rewriting **AWS** IAM policy-evaluation queries with jsonb array elements and multi-stage CTEs — improving query performance 40% and eliminating a class of false-positive findings.
- Engineered core features for Tailpipe, a CLI on DuckDB + Parquet, lifting log-processing throughput 30% to 1,000+ logs per second by chunking and batching file reads and streaming writes; reduced memory use to eliminate out-of-memory failures at scale.
- Resolved a production incident by diagnosing a Go service stuck in a **Kubernetes** CrashLoopBackOff — investigating pod logs and status and collaborating with the platform team to restore service.

Kredey (Kredey Innovations Pvt. Ltd.) Remote

2021

Full-Stack Website Developer (Intern)

- Used **Elasticsearch** to support full-text and semantic search over a NoSQL Firebase-backed document-sharing platform.

PROJECTS

TODO / Tasks REST API (Apr 2026)

API-first REST backend in **TypeScript** with Bun, Express.js 5, and SQLite (bun:sqlite) + Zod + jose (JWT). JWT authentication (access, ID, and refresh tokens), RBAC, a prepared-statement CRUD service layer with crypto.randomUUID() IDs, schema-validated controllers with proper REST status codes (201/204/400/404), database migrations, and route-heatmap middleware.

EDUCATION

University of Engineering & Management (UEM) Kolkata, WB, IN

August 2019 – May 2023

Bachelor of Technology in Computer Science and Engineering

CGPA: 9.28

Relevant Coursework: Object-Oriented Programming, DBMS, Data Structures and Algorithms, Shell Scripting in Linux, Low-Level Design, High-Level Design
