SUMMARY

Senior Backend Engineer (**Go**), **Continuous Delivery** with 3.5+ years of experience and expertise in **Go**, **distributed systems**, continuous-delivery/**release** orchestration, and policy-based **governance** for enterprise platforms. Owned **release** engineering end-to-end for four open-source **Go** CLIs at Turbot HQ (9,300+ GitHub stars, 120+ merged PRs), unifying GitHub Actions **release** workflows and cutting Azure resource-discovery latency 70-90% through **AI**-assisted automation.

TECHNICAL SKILLS

Languages: Go, Python, TypeScript, JavaScript (ES6+), SQL, Bash, HCL

Backend & Distributed Systems: REST, gRPC, Microservices, Event-Driven Architecture, Distributed Systems, OAuth 2.0 (Auth0), JWT

Continuous Delivery & DevOps: GitHub Actions, CI/CD, Release Engineering, GHCR, Docker, Kubernetes (working knowledge; collaborate with platform teams), Git, Code Review

Messaging & Streaming: Apache Kafka (consumer groups, DLQs), AWS SNS/SQS, AWS EventBridge, Azure Event Grid

Policy & Governance: Policy-based governance, rule builders, scoring engines, CIS, NIST, HIPAA, PCI DSS v4, SOC 2, FedRAMP; IAM, RBAC

AI-Powered Engineering: LLM Application Development, Agentic Workflows, Multi-Agent Systems, Model Context Protocol (MCP), OpenAI Agents SDK, Pydantic AI, Claude Code, Cursor, Codex

Cloud & Databases: AWS (EC2, Lambda), Azure, GCP, PostgreSQL, MySQL, DuckDB

WORK EXPERIENCE

Turbot HQ, Inc. Remote

August 2022 – April 2026

Software Engineer I

- Owned **release** engineering end-to-end for four open-source **Go** CLIs (Steampipe, Powerpipe, Flowpipe, Tailpipe) — unified GitHub Actions continuous-delivery workflows, automated Slack **release** notifications, and GHCR **Docker** image tagging.
- Built GitHub-as-a-cloud **governance** controls extending Guardrails with rule builders, a scoring engine, and policy-based prevention rules for branch protection, workflow permissions, runner access, dependency restrictions, MFA, and commit-author rules — enterprise-grade **governance** for distributed engineering teams.
- Authored an LLM-driven Claude Code skill automating code refactoring, unit test generation, deployment, and PR creation as part of a daily **AI**-powered engineering workflow; used it to migrate 35+ Azure cloud-**governance** modules to push-based eventing via Azure Event Grid, cutting resource-discovery latency 70-90%.
- Designed and developed an internal REST API microservice in **Go** using the Gin framework as part of a **greenfield** build of Turbot Guardrails; secured endpoints with OAuth 2.0 authentication via Auth0, containerized with **Docker**, deployed to AWS EC2, and served as a gRPC client for several internal distributed microservices.
- Built a Kafka-based, **event-driven** distributed pipeline where consumers asynchronously processed policy-enforcement events; added a dead-letter queue (DLQ) for reliable failure handling and reprocessing.
- Resolved a production incident by diagnosing a **Go** service stuck in a **Kubernetes** CrashLoopBackOff — investigating pod logs and status and collaborating with the platform team to restore service.
- Mentored teammates on adopting **AI**-assisted engineering tools (Claude Code, Cursor) into their daily workflows.

EDUCATION

University of Engineering & Management (UEM) Kolkata, WB, IN

August 2019 – May 2023

Bachelor of Technology in Computer Science and Engineering

CGPA: 9.28

Relevant Coursework: Object-Oriented Programming, DBMS, Data Structures and Algorithms, Shell Scripting in Linux, Low-Level Design, High-Level Design
