SUMMARY

Full-stack engineer with 3.5+ years of experience in **React**, **Node.js**, **database** design, and **LLM** API integration with **streaming** responses, built across early-stage startups owning features end-to-end with no dedicated DevOps or QA team. Shipped an MCP server and multi-agent **LLM** tooling for Turbot HQ (9,300+ GitHub stars, 120+ merged PRs), cutting resource-discovery latency 70–90%.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Go, Python, SQL, Bash

Frontend: React, MUI, Three.js, HTML, CSS

Backend & APIs: Node.js, Express.js, Gin, REST, WebSockets, Microservices, Event-Driven Architecture, OAuth 2.0 (Auth0), JWT, Zod, Bun

AI & Agentic Engineering: LLM Application Development, Streaming Responses, Prompt Engineering, Multi-Agent Systems, Model Context Protocol (MCP), OpenAI Agents SDK, Pydantic AI

Databases & SQL: PostgreSQL, MySQL, MongoDB, SQLite, Firebase/Firestore, Redis; database design, indexing, transactions, database migrations

Cloud & DevOps: AWS (Lambda, EC2, RDS, S3), Azure, GCP, Docker, Kubernetes (working knowledge), GitHub Actions, CI/CD, Git

Testing & Quality: Unit Testing, Integration Testing, Jest, Mocha, Automated CI Testing, Code Review

WORK EXPERIENCE

Turbot HQ, Inc. Remote

August 2022 – April 2026

Multi-cloud security and compliance software; makers of the open-source Steampipe/Powerpipe/Flowpipe/Tailpipe suite and the Turbot Guardrails PSPM platform.

Software Engineer I

- Designed and built an internal REST API microservice in Go/Gin as part of a greenfield build of Turbot Guardrails, a PSPM SaaS product — an independent architectural call — secured with OAuth 2.0 (Auth0), containerized with Docker, and deployed to production on AWS EC2 with no dedicated DevOps team.
- Built the Steampipe Model Context Protocol (MCP) server end to end in Python, giving **LLM** agents standardized, real-time access to enterprise cloud and security data for retrieval and analysis.
- Designed a multi-agent workflow on the OpenAI Agents SDK orchestrating **LLM** agents that generate, validate, and self-correct cloud policy commands — hands-on **LLM** API integration and prompt design end to end.
- Led the AWS SDK v2-to-v3 migration across 180+ call sites in production **Node.js** Lambdas, refactoring discovery and config-sync workflows; cut policy-code duplication ~60% via Nunjucks templating.

Trisetra, Inc. Remote

February 2022 – June 2022

Early-stage Palo Alto startup building an AI-powered 3D product-visualization / interior-design SaaS.

Frontend Software Developer Intern (SDE Intern)

- Led the user-upload workflow redesign across 60+ files in **React** (Google Maps autocomplete, drag-and-drop upload, history dashboard) at an early-stage startup with no dedicated QA team, shipping full features independently.

PROJECTS

General-Purpose AI Chatbot / Agent (Model Context Protocol) (Jun 2025 – Aug 2025)

Agentic chatbot/agent framework built with Pydantic AI featuring configurable external MCP servers via a persistent MongoDB-backed registry, JSON config loader with strict input validation, per-server failure isolation, native tool calling, mid-conversation multi-model switching (OpenAI, Gemini, Anthropic, Mistral), conversation-history persistence, sync + **streaming** output, prompt-injection safeguards, and Logfire observability.

TODO / Tasks REST API (Apr 2026)

API-first REST backend in TypeScript with Bun, **Express.js** 5, and SQLite + Zod + jose (JWT). JWT authentication, RBAC, a prepared-statement CRUD service layer, schema-validated controllers with proper REST status codes, and **database** migrations.

EDUCATION

University of Engineering & Management (UEM) Kolkata, WB, IN

August 2019 – May 2023

Bachelor of Technology in Computer Science and Engineering

CGPA: 9.28

Relevant Coursework: Object-Oriented Programming, DBMS, Data Structures and Algorithms, Shell Scripting in Linux, Low-Level Design, High-Level Design
