SUMMARY

Backend-leaning full-stack software engineer with 3.5+ years building scalable, distributed backend services in **Go (Golang)** and **Python** — including **Kafka**-based **event-driven** pipelines on **AWS** — plus production **React** experience shipping user-facing features and fixing component-lifecycle and rendering bugs. Built a **Go/Gin REST** API microservice at Turbot HQ (one of 120+ merged **pull requests** across its 9,300★ open-source suite) and led a 60+ file **React** user-upload workflow redesign at Trisetra.

TECHNICAL SKILLS

Languages: Go (Golang), Python, TypeScript, JavaScript (ES6+), SQL, Bash, HCL

Frontend: React, MUI, Three.js, A-Frame, HTML, CSS

Backend & APIs: Microservices, Event-Driven Architecture, Distributed Systems, Serverless, REST, GraphQL, gRPC, WebSockets, OAuth 2.0 (Auth0), JWT, Node.js, Express.js, Gin, Bun

Messaging & Streaming: Apache Kafka (consumer groups, DLQs), AWS SNS/SQS, AWS EventBridge, Azure Event Grid

Databases & SQL: PostgreSQL, MongoDB, MySQL, DuckDB, SQLite, Redis (ElastiCache), Firebase/Firestore; jsonb, CTEs, indexing, transactions, database migrations

Cloud & Serverless: AWS (Lambda, EC2, RDS, S3), Azure, GCP, OCI, AliCloud

IaC & DevOps: Terraform, Docker, Kubernetes (working knowledge; collaborate with platform teams), GitHub Actions, Git

Testing & Quality: Unit Testing, Integration Testing, Jest, Mocha, Automated CI Testing, Code Review

WORK EXPERIENCE

Turbot HQ, Inc. Remote

August 2022 – April 2026

Software Engineer I

- Designed and developed an internal RESTful API microservice in **Go (Golang)** using the Gin framework as part of a greenfield build of Turbot Guardrails, a Preventive Security Posture Management (PSPM) SaaS product; secured endpoints with OAuth 2.0 (Auth0), containerized with **Docker**, deployed to **AWS** EC2, and served as a **gRPC** client for several internal microservices.
- Built a **Kafka**-based, fire-and-forget **event-driven** pipeline for Turbot Guardrails, reasoning through fault-tolerance trade-offs: consumers asynchronously processed policy-enforcement events and fired a webhook once a policy was successfully enforced against a resource, with a dead-letter queue (DLQ) added to capture recurring failures for manual investigation.
- Authored an LLM-driven Claude Code skill automating code refactoring, **unit test** generation, deployment, **Terraform**-driven **integration testing**, and PR creation; used it to migrate 35+ Azure cloud-governance modules to an **event-driven** architecture via Azure Event Grid, cutting resource-discovery latency 70–90%.
- Optimized complex **PostgreSQL** queries and data models powering customer compliance audits — rewriting **AWS** IAM policy-evaluation queries with jsonb array elements and multi-stage CTEs — improving query performance 40% (cutting report generation from 3 minutes to 1.5 minutes across 10,000+ resources).
- Owned release engineering for four open-source **Go** CLIs (Steampipe, Powerpipe, Flowpipe, Tailpipe) and extended the shared pipe-fittings **Go** library to ship HCL function-call support across two of them (a top-requested, reusable framework feature) — one of 120+ merged **pull requests** shipped through GitHub PR **code review**.

Trisetra, Inc. Remote

February 2022 – June 2022

Frontend Software Developer Intern (SDE Intern)

- Led the user-upload workflow redesign across 60+ files in **React** (Google Maps autocomplete, drag-and-drop upload, history dashboard, invite-code sign-up, improved empty/error states) — building and iterating on **UI components** — driving increased user engagement.
- Built supporting 3D scene infrastructure in **React** — auto-crop image pipeline, IndexedDB-backed asset caching (fixing a recurring double-render bug), and bounding-box rotation control with surface-normal preservation across the scene graph.
- Contributed to an incremental migration from **React** 17 to **React** 19 and MUI 4 to MUI 7, fixing component re-rendering issues in existing components; also authored a 3D-geometry library with the repo's first Mocha unit-test suite.

EDUCATION

University of Engineering & Management (UEM) Kolkata, WB, IN

August 2019 – May 2023

Bachelor of Technology in Computer Science and Engineering

CGPA: 9.28

Relevant Coursework: Object-Oriented Programming, DBMS, Data Structures and Algorithms, Shell Scripting in Linux, Low-Level Design, High-Level Design
