SUMMARY

Backend Software Engineer with 3.5+ years building distributed **microservices** in **Golang** and **Node.js** on **AWS**, with hands-on **CI/CD** pipelines, cloud-native services, and production **monitoring** and **troubleshooting**. At Turbot HQ — a multi-cloud **security**, governance, and compliance software company — built a Kafka-based policy-enforcement pipeline and cut resource-discovery latency 70–90% by migrating 35+ cloud-governance modules to event-driven architecture.

TECHNICAL SKILLS

Languages: Go (Golang), Python, TypeScript, JavaScript (ES6+), SQL, Bash, HCL

Backend & APIs: Microservices, Event-Driven Architecture, Distributed Systems, Serverless, REST, gRPC, OAuth 2.0 (Auth0), JWT, Node.js, Express.js, Gin

Messaging & Streaming: Apache Kafka (consumer groups, DLQs), AWS SNS/SQS, AWS EventBridge, Azure Event Grid

Databases & SQL: PostgreSQL, MongoDB, DuckDB, SQLite, Redis; query tuning, indexing, transactions, database migrations

Cloud & Serverless: AWS (Lambda, EC2, S3, SecurityHub, GuardDuty, ControlTower), Azure, GCP, OCI

IaC & DevOps: Terraform, Docker, Kubernetes (working knowledge), GitHub Actions, Jenkins, Git

Observability: Datadog, OpenTelemetry (OTel); metrics, logging, tracing, performance monitoring, incident triage

Security & Compliance: CIS (AWS, Azure, GCP, M365, GitHub, Google Workspace), NIST, HIPAA, PCI DSS v4, SOC 2, FedRAMP; IAM, RBAC, cloud security policies, data visibility, policy enforcement, SIEM

WORK EXPERIENCE

Turbot HQ, Inc. Remote

August 2022 – April 2026

Multi-cloud security, governance, and compliance software; makers of the open-source Steampipe / Powerpipe / Flowpipe / Tailpipe suite and the commercial Turbot Guardrails PSPM platform. Remote-first.

Software Engineer I

- Designed and built an internal REST microservice in **Golang** (Gin) as part of a greenfield build of Turbot Guardrails, a **cloud security** SaaS product; secured with OAuth 2.0 (Auth0), containerized with Docker, deployed to **AWS** EC2, and served as a gRPC client for internal **microservices**.
- Built a Kafka-based event-driven pipeline processing policy-enforcement events asynchronously and firing a webhook once a policy was enforced against a cloud resource, with a dead-letter queue (DLQ) for failure investigation and debugging.
- Led the **AWS** SDK v2→v3 migration across 180+ call sites and 11+ **AWS** services in production **Node.js** Lambdas, reducing policy-code duplication ~60% and unblocking a **Node.js** runtime upgrade past **AWS** SDK v2 EOL.
- Authored 11 **AWS** log-source tables (**Golang**) for **data visibility** across CloudTrail, GuardDuty, SecurityHub, VPC flow, and WAF logs plus 25+ security detections, lifting log-processing throughput 30% to 1,000+ logs/sec.
- Authored multi-cloud compliance modules (HCL + SQL, 1,000+ resource checks) across CIS, NIST, HIPAA, PCI DSS v4, SOC 2, and FedRAMP frameworks for enterprise finance/healthcare/government customers, cutting compliance-audit time 50%.
- Owned **CI/CD** release engineering for four open-source **Golang** CLIs — unified GitHub Actions pipelines with automated multi-distro Linux smoke tests, hardening release safety and catching regressions before deployment.

EDUCATION

University of Engineering & Management (UEM) Kolkata, WB, IN

August 2019 – May 2023

Bachelor of Technology in Computer Science and Engineering

CGPA: 9.28
