SUMMARY

Cloud AI Engineer with 3.5+ years building scalable, distributed cloud infrastructure across **AWS, Azure, and GCP** — hands-on with **Terraform/HCL, Kubernetes, Docker, GitHub Actions** CI/CD, and **Kafka event-driven** pipelines — and integrating **agentic AI** (Model Context Protocol, **multi-agent LLM** workflows) into production systems using **Claude Code** as a default engineering workflow. Built the Steampipe MCP server and an **LLM-driven Claude Code** automation that migrated 35+ **Azure** modules to **event-driven** architecture, cutting resource-discovery latency 70–90% — one of 120+ merged **pull requests** across Turbot's 9,300 ★ open-source suite.

TECHNICAL SKILLS

Languages: Go, Python, TypeScript, JavaScript (ES6+), SQL, Bash, HCL

AI & Agentic Engineering: LLM Application Development, Agentic Workflows, Multi-Agent Systems, Retrieval-Augmented Generation (RAG), Model Context Protocol (MCP), OpenAI Agents SDK, Pydantic AI, Claude Code, Cursor, Codex, Logfire (LLM observability)

IaC & DevOps: Terraform, OpenTofu, HCL, Docker, Kubernetes (working knowledge; collaborate with platform teams), GitHub Actions, Git

Cloud & Serverless: AWS (Lambda, EC2, RDS, S3, SecurityHub, GuardDuty, ControlTower, Shield, X-Ray, EFS), Azure, GCP, OCI, AliCloud

Messaging & Streaming: Apache Kafka (consumer groups, DLQs), AWS SNS/SQS, AWS EventBridge, Azure Event Grid

Backend & APIs: Microservices, Event-Driven Architecture, Distributed Systems, Serverless, REST, gRPC, OAuth 2.0 (Auth0), JWT

Databases & SQL: PostgreSQL, MySQL, MongoDB, DuckDB, SQLite, Redis (ElastiCache); jsonb, CTEs, query tuning, indexing, transactions, database migrations

Observability: Datadog, OpenTelemetry (OTel), Logfire; metrics, logging, tracing, incident triage

Security & Compliance: IAM, RBAC, CIS (AWS, Azure, GCP), NIST, HIPAA, PCI DSS v4, SOC 2, FedRAMP, cloud security policies

WORK EXPERIENCE

Turbot HQ, Inc. Remote
Software Engineer I

August 2022 – April 2026

- Built the Steampipe Model Context Protocol (MCP) server end to end in **Python**, giving **LLM** agents standardized, real-time access to enterprise cloud and security data for retrieval and analysis.
- Designed a **multi-agent** workflow on the OpenAI Agents SDK to orchestrate **LLM** agents that generate cloud preventive-policy commands, validate them in a live test environment, self-correct failures, and score accounts against an internal security metric — applying **agentic AI** directly to production infrastructure.
- Authored an **LLM-driven Claude Code** skill automating code refactoring, **unit test** generation, deployment, **Terraform-driven integration testing**, and PR creation; used it to migrate 35+ **Azure** cloud-governance modules from polling to an **event-driven** architecture via **Azure** Event Grid, cutting resource-discovery latency 70–90% and eliminating recurring **Azure** API throttling.
- Built a **Kafka**-based, fire-and-forget **event-driven** pipeline for Turbot Guardrails, where consumers asynchronously processed policy-enforcement events and fired a webhook once a policy was successfully enforced against a resource; added a dead-letter queue (DLQ) to capture recurring failures for manual investigation and debugging.
- Designed and developed an internal RESTful API microservice in **Go** using the Gin framework as part of a greenfield build of Turbot Guardrails, a Preventive Security Posture Management (PSPM) SaaS product; secured endpoints with **OAuth 2.0** (Auth0), containerized with **Docker**, deployed to **AWS** EC2, and served as a **gRPC** client for several internal microservices; all changes shipped through peer **code review** via GitHub **pull requests**.
- Optimized complex **PostgreSQL** queries powering customer compliance audits — rewriting **AWS IAM** policy-evaluation queries with jsonb array elements and multi-stage CTEs — resolving a production performance bottleneck: 40% faster queries (cutting report generation from 3 minutes to 1.5 minutes across 10,000+ resources) and eliminating a class of false-positive findings.

EDUCATION

University of Engineering & Management (UEM) Kolkata, WB, IN
Bachelor of Technology in Computer Science and Engineering
CGPA: 9.28

August 2019 – May 2023

Relevant Coursework: Object-Oriented Programming, DBMS, Data Structures and Algorithms, Shell Scripting in Linux, Low-Level Design, High-Level Design
