SUMMARY

Software engineer with 3.5+ years of experience and expertise in **Python**, **agentic** AI systems, **Model Context Protocol (MCP)**, and backend platform engineering, building with **Claude Code** and the **OpenAI** Agents SDK as a default workflow rather than a novelty. Authored an LLM-driven **Claude Code** skill that automated refactoring, testing, and deployment at Turbot HQ, using it to migrate 35+ **Azure** cloud-governance modules to event-driven architecture and cut resource-discovery latency 70–90%.

TECHNICAL SKILLS

Languages: Python, Go, TypeScript, JavaScript (ES6+), SQL, Bash

AI & Agentic Engineering: LLM Application Development, Agentic Workflows, Multi-Agent Systems, Retrieval-Augmented Generation (RAG), Model Context Protocol (MCP), OpenAI Agents SDK, Pydantic AI, Anthropic Claude, OpenAI, Google Gemini, Prompt Engineering, Claude Code, Cursor, Codex, Logfire (LLM observability)

Backend & APIs: Microservices, Event-Driven Architecture, Distributed Systems, Serverless, REST, gRPC, OAuth 2.0 (Auth0), JWT

Databases & Vector Search: PostgreSQL (Postgres), MongoDB, DuckDB, Redis (ElastiCache), AWS S3 vector storage; jsonb, CTEs, query tuning, indexing, transactions

Cloud & DevOps: AWS (Lambda, EC2, S3), Azure, GCP, Docker, Kubernetes (working knowledge; collaborate with platform teams), GitHub Actions

Observability: Datadog, OpenTelemetry (OTel), Logfire; metrics, logging, tracing, incident triage

Core CS: Data Structures & Algorithms, Object-Oriented Design, Low-Level & High-Level System Design, API Design

WORK EXPERIENCE

Turbot HQ, Inc. Remote

August 2022 – April 2026

Software Engineer I

- Authored an LLM-driven **Claude Code** skill automating code refactoring, unit test generation, deployment, Terraform-driven integration testing, and PR creation — building with **agentic** tooling as a default workflow, not an experiment; used it to migrate 35+ **Azure** cloud-governance modules from polling to push-based eventing via **Azure** Event Grid, cutting resource-discovery latency 70–90% and eliminating recurring **Azure** API throttling.
- Built the Steampipe **Model Context Protocol (MCP)** server end to end in **Python** — one of 120+ merged pull requests across Turbot's four open-source products (9,300+ combined GitHub stars) — giving LLM agents standardized, real-time access to enterprise cloud and security data for retrieval and analysis.
- Designed a **multi-agent** workflow on the **OpenAI** Agents SDK to orchestrate LLM agents that generate cloud preventive-policy commands, validate them in a live test environment, self-correct failures, and score accounts against an internal security metric.
- Built a **RAG**-based internal **Pydantic AI** agent to resolve cross-team queries by ingesting the documentation and code graph for all internal repos into **AWS** S3 vector storage; deployed it to **AWS** Lambda and integrated it with the Slack Bot API as the UI for instant, context-aware query resolution.
- Optimized complex **PostgreSQL** queries powering customer compliance audits — rewriting **AWS** IAM policy-evaluation queries with jsonb array elements and multi-stage CTEs — improving query performance 40% (cutting report generation from 3 minutes to 1.5 minutes across 10,000+ resources) and eliminating a class of false-positive findings.

PROJECTS

General-Purpose AI Chatbot / Agent (Model Context Protocol) (Jun 2025 – Aug 2025)

Agentic chatbot/agent framework built with **Pydantic AI** featuring configurable external **MCP** servers via a persistent MongoDB-backed registry, JSON config loader with strict input validation, per-server failure isolation, native tool calling, mid-conversation multi-model switching (**OpenAI**, **Gemini**, **Anthropic**, **Mistral**), conversation-history persistence, sync + streaming output, prompt-injection safeguards, and **Logfire** observability.

EDUCATION

University of Engineering & Management (UEM) Kolkata, WB, IN

August 2019 – May 2023

Bachelor of Technology in Computer Science and Engineering

CGPA: 9.28

Relevant Coursework: Object-Oriented Programming, DBMS, Data Structures and Algorithms, Shell Scripting in Linux, Low-Level Design, High-Level Design
