SUMMARY

Accomplished Full-Stack / Backend Engineer with 3.5+ years of experience and expertise in **Node.js**, **TypeScript**, RESTful **APIs**, **SQL**, **Docker**, and event-driven **microservices**. At Turbot HQ, delivered 70–90% latency reduction by migrating 35+ modules to **event-driven architecture**, improved **PostgreSQL** audit-query performance by 40%, and contributed across four open-source products with 120+ merged PRs and 9,300+ combined GitHub stars.

TECHNICAL SKILLS

Languages: Node.js, TypeScript, JavaScript (ES6+), Go, Python, SQL

Backend & APIs: RESTful API Design, Express.js, Node.js Services, Microservices, Event-Driven Architecture, Distributed Systems, OAuth 2.0, gRPC, JWT

Databases: PostgreSQL, MySQL, MongoDB, SQLite, Firestore, Query Optimization, JSONB, CTEs

Cloud & Containers: GCP, AWS (EC2, Lambda), Azure, Docker, Serverless Workloads

Messaging: Apache Kafka (consumer groups, DLQs), Event Processing, Async Workflows

DevOps & Delivery: CI/CD, GitHub Actions, Git, GHCR, Terraform (working knowledge), Documentation

Engineering Practices: Code Reviews, Testing, System Design Fundamentals, Debugging, Cross-Functional Collaboration (Frontend, QA, Product)

WORK EXPERIENCE

Turbot HQ, Inc.

August 2022 – April 2026

Software Engineer I

- Designed and developed an internal **REST API** microservice in Go (Gin) for Turbot Guardrails, secured endpoints with OAuth 2.0 via Auth0, containerized with **Docker**, deployed to AWS EC2, and integrated it as a gRPC client for internal **microservices**.
- Led AWS SDK for **JavaScript** v2 to v3 migration across 180+ call sites and 11+ AWS services in production **Node.js** Lambdas, reducing policy-code duplication ~60% and unblocking **Node.js** runtime upgrades.
- Built a **Kafka**-based event-driven pipeline with asynchronous consumers and dead-letter-queue handling to process policy-enforcement events reliably at scale.
- Re-architected 35+ cloud-governance modules from polling to push-based eventing via Azure Event Grid, cutting resource-discovery latency 70–90% and reducing API throttling issues.
- Optimized **PostgreSQL** audit queries using JSONB and multi-stage CTE rewrites, improving performance 40% (from 3 minutes to 1.5 minutes) across 10,000+ resources.
- Authored multi-cloud compliance modules in HCL + **SQL** across AWS, Azure, **GCP**, M365, Google Workspace, and GitHub standards, reducing enterprise compliance-audit time 50%.
- Added multi-distro Linux smoke tests to GitHub Actions release pipelines, improving **CI/CD** reliability before deployment.
- Owned release engineering for four open-source products (Steampipe, Powerpipe, Flowpipe, Tailpipe), including unified GitHub Actions workflows, GHCR **Docker** tagging, and shipped shared-library enhancements.

Trisetra, Inc.

2022

Frontend Software Developer Intern (SDE Intern)

- Built a 3D-geometry library and introduced the first Mocha unit-test suite with real 3D-asset fixtures, improving code quality and maintainability in production UI workflows.

Kredey (Kredey Innovations Pvt. Ltd.)

2021

Full-Stack Website Developer (Intern)

- Built a React + Firebase full-stack document-sharing platform with chat and notifications, and implemented Elasticsearch for full-text and semantic search over NoSQL data.

PROJECTS

TODO / Tasks REST API

API-first REST backend in **Node.js** + **TypeScript** using **Express.js** and SQLite, with JWT authentication (access, ID, refresh), RBAC, schema validation, migrations, and production-ready status handling (201/204/400/404).

Friend-A-Book — Real-Time PDF Sharing Platform

Built a full-stack React + Firebase platform with real-time chat, push/email notifications, integrated PDF viewing, and Elasticsearch-powered full-text search.

CERTIFICATIONS

- Machine Learning for All — University of London (Coursera) (Oct 2020) [\[certificate\]](#)
- C for Everyone: Programming Fundamentals — University of California, Santa Cruz (Coursera) (Oct 2020) [\[certificate\]](#)
- HTML — SoloLearn (Aug 2020) [\[certificate\]](#)
- PHP — SoloLearn (Sep 2020) [\[certificate\]](#)

EDUCATION

University of Engineering & Management (UEM) Kolkata, WB, IN

August 2019 – May 2023

Bachelor of Technology in Computer Science and Engineering

CGPA: 9.28

Relevant Coursework: Object-Oriented Programming, DBMS, Data Structures and Algorithms, Shell Scripting in Linux, Low-Level Design, High-Level Design
