SUMMARY

DevOps Engineer with 3.5+ years of experience and expertise in **AWS**, **Kubernetes**, **Terraform**, and **CI/CD automation** across multi-cloud environments (**AWS**, **Azure**, **GCP**). Owned release engineering and **CI/CD automation** for four open-source cloud-infrastructure products at Turbot HQ (9,300+ GitHub stars), and led an **AWS** SDK migration across 180+ call sites and 11+ **AWS** services, keeping production systems supported past **AWS** SDK v2 end-of-life.

TECHNICAL SKILLS

Scripting & Languages: Python, Bash, Go, SQL

IaC & Automation: Terraform, OpenTofu, HCL, GitHub Actions, GHCR

Cloud Platforms (Multi-Cloud): AWS (Lambda, EC2, S3, SecurityHub, GuardDuty, ControlTower, Shield, X-Ray, Comprehend, Pinpoint, RAM, EFS), Azure, GCP

Containers & Orchestration: Docker, Kubernetes (working knowledge; collaborate with platform teams)

Observability: Datadog, OpenTelemetry (OTel); metrics, logging, tracing, incident triage

CI/CD & Release Engineering: GitHub Actions, CI/CD, Git, Release Engineering

Linux & Systems: Multi-distro Linux (CentOS, Ubuntu ARM64, macOS), production incident diagnosis & troubleshooting

WORK EXPERIENCE

Turbot HQ, Inc. Remote

August 2022 – April 2026

Software Engineer I

- Owned release engineering end-to-end for four open-source Go CLIs (Steampipe, Powerpipe, Flowpipe, Tailpipe) — unified **GitHub Actions** CI/CD workflows, automated Slack release notifications, and GHCR **Docker** image tagging.
- Added multi-distro **Linux** smoke tests (ephemeral environments across CentOS, Ubuntu ARM64, macOS) to the **GitHub Actions** release pipeline, hardening release safety and catching regressions before deployment — preventing incidents before they reached production.
- Authored an LLM-driven Claude Code skill automating code refactoring, unit test generation, deployment, **Terraform**-driven integration testing, and PR creation; used it to migrate 35+ **Azure** cloud-governance modules from polling to push-based eventing via **Azure** Event Grid, cutting resource-discovery latency 70-90% and eliminating recurring **Azure** API throttling.
- Led the **AWS** SDK for JavaScript v2 to v3 migration across 180+ call sites and 11+ **AWS** services (SecurityHub, CloudWatch, ControlTower, Shield, Comprehend, Pinpoint, RAM, X-Ray, EC2, EFS) in production Lambdas, keeping the platform supported past **AWS** SDK v2 EOL.
- Designed and developed an internal REST API microservice in Go using the Gin framework as part of a greenfield build of Turbot Guardrails, a cloud-native SaaS platform; containerized with **Docker**, deployed to **AWS** EC2, and served as a gRPC client for several internal microservices.
- Resolved a production **incident** by diagnosing a Go service stuck in a **Kubernetes** CrashLoopBackOff — investigating pod logs and status and collaborating with the platform team to restore service.

EDUCATION

University of Engineering & Management (UEM) Kolkata, WB, IN

August 2019 – May 2023

Bachelor of Technology in Computer Science and Engineering

CGPA: 9.28

Relevant Coursework: Object-Oriented Programming, DBMS, Data Structures and Algorithms, Shell Scripting in Linux, Low-Level Design, High-Level Design
