SUMMARY

Senior Software Engineer with 3.5+ years of experience and expertise in **Python**, **TypeScript**, **AWS** cloud-native services, and **event-driven** architectures. Authored **AWS** log-source tables and detections for **CloudTrail**, **GuardDuty**, and **SecurityHub** at Turbot HQ, and built a **Kafka**-based **event-driven** pipeline, contributing to a platform that cut enterprise compliance-audit time 50%.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript (ES6+), Go, SQL, Bash

Backend & APIs: REST, gRPC, Express.js (Node.js), Microservices, OAuth 2.0 (Auth0), JWT, Pydantic

Frontend: React, TypeScript, Vite

AWS Security & Observability: AWS SecurityHub, GuardDuty, CloudTrail, ControlTower, Shield

Cloud Platforms: AWS (Lambda, EC2, RDS, S3), Azure, GCP

Distributed & Event-Driven Systems: Distributed Systems, Event-Driven Architecture, Apache Kafka (consumer groups, DLQs), Azure Event Grid

Databases: PostgreSQL (AWS RDS), MySQL, MongoDB, DuckDB; jsonb, CTEs, query tuning, schema design

IaC & DevOps: Docker, Terraform, GitHub Actions, CI/CD, Git, Jira

Observability & Testing: Datadog, OpenTelemetry (OTel), Unit Testing, Integration Testing, Code Review

WORK EXPERIENCE

Turbot HQ, Inc. Remote

August 2022 – April 2026

Software Engineer I

- Authored 11 **AWS** log-source tables for Tailpipe in Go — including **CloudTrail**, **GuardDuty**, **SecurityHub**, ALB access logs, and **S3** access logs — plus 25+ pre-built security detections, working directly with the same **AWS** observability and security services this role centers on.
- Built the Steampipe Model Context Protocol (MCP) server end to end in **Python**, giving LLM agents standardized, real-time access to enterprise cloud and security data.
- Built a RAG-based Pydantic AI agent with a knowledge base ingested into **S3** vector storage; deployed it as a serverless **AWS Lambda** function and integrated it with the Slack Bot API for instant developer access.
- Built a **Kafka**-based, **event-driven** pipeline where consumers asynchronously processed policy-enforcement events and fired a webhook once a policy was enforced; added a dead-letter queue (DLQ) to capture recurring failures for retry and investigation.
- Designed and developed an internal REST API microservice in Go using the Gin framework as part of a greenfield build of Turbot Guardrails; secured endpoints with OAuth 2.0 authentication via Auth0, containerized with **Docker**, deployed to **AWS EC2**, and served as a gRPC client for several internal microservices.
- Optimized complex **PostgreSQL (AWS RDS)** queries powering customer compliance audits — rewriting **AWS** IAM policy-evaluation queries with jsonb array elements and multi-stage CTEs — improving query performance 40% and eliminating a class of false-positive findings.
- Resolved a production **incident** by diagnosing a Go service stuck in a Kubernetes CrashLoopBackOff — investigating pod logs and status and collaborating with the platform team to restore service, the same root-cause discipline an **on-call** rotation demands.
- Authored an LLM-driven Claude Code skill automating code refactoring, test generation, deployment, **Terraform**-driven integration testing, and PR creation; used it to migrate 35+ Azure cloud-governance modules to **event-driven** eventing via Azure Event Grid, cutting resource-discovery latency 70-90%.

PROJECTS

Lila Tic-Tac-Toe — Real-Time Multiplayer Game (2026)

Built end to end in 4 days: **React 19** + **TypeScript** + Vite frontend on Vercel; Nakama game server (Go core + TS runtime) on Fly.io with **PostgreSQL**. Server-authoritative anti-cheat over WebSocket transport, mode-aware matchmaking via KV-storage queues, and optimistic UI with revert-on-validation-failure.

EDUCATION

University of Engineering & Management (UEM) Kolkata, WB, IN

August 2019 – May 2023

Bachelor of Technology in Computer Science and Engineering

CGPA: 9.28

Relevant Coursework: Object-Oriented Programming, DBMS, Data Structures and Algorithms, Shell Scripting in Linux, Low-Level Design, High-Level Design
