SUMMARY

Accomplished GenAI Developer with 6.5+ years of software engineering experience and expertise in **Claude Code**, **Model Context Protocol (MCP)**, **multi-agent** orchestration, and **Python/Go** backend engineering. Authored an LLM-driven **Claude Code** skill automating refactoring, **testing**, and deployment to migrate 35+ **Azure** cloud-governance modules to event-driven architecture, cutting resource-discovery latency 70–90% for Turbot HQ, Inc.

TECHNICAL SKILLS

Languages: Go, Python, TypeScript, JavaScript (ES6+), SQL

AI & Agentic Engineering: LLM Application Development, Agentic Workflows, Multi-Agent Systems, Retrieval-Augmented Generation (RAG), AWS S3 Vector Storage, Prompt Engineering, Model Context Protocol (MCP), Tool/Function Calling, Structured Outputs, OpenAI Agents SDK, Pydantic AI, Claude Code, Cursor, Codex, Logfire (LLM observability), Prompt-Injection Safeguards, Agent-to-Agent (A2A) Protocol (conceptual familiarity)

Backend & APIs: Microservices, Event-Driven Architecture, Distributed Systems, Serverless, REST, gRPC, OAuth 2.0 (Auth0), JWT, Zod, Node.js, Express.js, Gin, Bun

Databases & SQL: PostgreSQL, MongoDB, SQLite; prepared statements, indexing, database migrations

Cloud & Serverless: AWS (Lambda, EC2, S3), Azure

IaC & DevOps / Cloud-Native Delivery: Terraform, HCL, Docker, GitHub Actions (CI/CD), Git

Observability: Logfire (LLM/prompt observability & tracing), metrics & logging

Testing & Quality: Unit Testing, Integration Testing, Automated CI Testing, Code Review

WORK EXPERIENCE

Turbot HQ, Inc. Remote

August 2022 – April 2026

Software Engineer II

- Authored an LLM-driven **Claude Code** skill automating code refactoring, unit test generation, deployment, and **Terraform**-driven integration **testing**; used it to migrate 35+ **Azure** cloud-governance modules from polling to a push-based, event-driven model via **Azure** Event Grid, cutting resource-discovery latency 70–90% and eliminating recurring **Azure** API throttling.
- Built the Steampipe **Model Context Protocol (MCP)** server end to end in **Python**, giving LLM agents standardized, real-time access to enterprise cloud and security data for retrieval and analysis.
- Designed a **multi-agent** workflow on the OpenAI Agents SDK to orchestrate LLM agents that generate cloud preventive-policy commands, validate them in a live test environment, self-correct failures, and score accounts against an internal security metric.
- Built a **RAG**-based internal Pydantic AI agent to resolve cross-team queries by ingesting documentation and code graphs for all internal repos into **AWS S3 vector storage (embeddings-based retrieval)**; deployed to **AWS Lambda** and integrated with the Slack Bot API, resolving onboarding and cross-team queries instantly.
- Designed and developed an internal REST API microservice in Go using the Gin framework as part of a greenfield build of Turbot Guardrails, a Preventive Security Posture Management (PSPM) SaaS product; secured endpoints with OAuth 2.0 authentication via Auth0, containerized with **Docker**, deployed to **AWS EC2**, and served as a gRPC client for several internal microservices.

PROJECTS

General-Purpose AI Chatbot / Agent (Model Context Protocol) (Jun 2025 – Aug 2025)

Agentic chatbot/agent framework built with Pydantic AI, producing **structured outputs**, featuring configurable external **MCP** servers via a persistent MongoDB-backed registry that routes tool calls per server with per-server failure isolation, native tool/function calling, mid-conversation multi-model switching (OpenAI, Gemini, Anthropic, Mistral), conversation-history persistence for multi-turn context management, sync + streaming output, **prompt-injection** safeguards, and **Logfire** observability/tracing.

TODO / Tasks REST API (Apr 2026)

API-first REST backend in **TypeScript** with Bun, Express.js 5, and SQLite (bun:sqlite) + Zod + jose (**JWT**). **JWT** authentication (access, ID, and refresh tokens), **RBAC**, a prepared-statement CRUD service layer, schema-validated controllers with proper REST status codes, and database migrations.

EDUCATION

University of Engineering & Management (UEM) Kolkata, WB, IN

Bachelor of Technology in Computer Science and Engineering

CGPA: 9.28

Relevant Coursework: Object-Oriented Programming, DBMS, Data Structures and Algorithms, Low-Level Design, High-Level Design
