SUMMARY

Accomplished **Software Engineer** with 3.5+ years of experience and expertise in **Go, Python, SQL, REST APIs**, and **system design** fundamentals. At Turbot, achieved 120+ merged pull requests across four **open-source** products (9,300+ GitHub stars) while shipping well-tested production features, maintaining **CI pipelines**, and resolving **production issues** across distributed cloud systems.

TECHNICAL SKILLS

Languages: Go, Python, TypeScript, JavaScript, SQL, Bash

Backend & APIs: REST APIs, Microservices, Event-Driven Architecture, Distributed Systems, gRPC, OAuth 2.0 (Auth0), JWT, Gin, Express.js

Databases: PostgreSQL, MySQL, DuckDB, SQLite, Firebase/Firestore (NoSQL), Elasticsearch, Query Tuning, CTEs, jsonb

Cloud, Containers & Delivery: AWS (Lambda, EC2, S3), Azure, GCP, Docker, Kubernetes (working knowledge), GitHub Actions, CI Pipelines, Apache Kafka, DLQ

Core CS & Quality: Data Structures and Algorithms, System Design Basics, Debugging, Unit Testing, Integration Testing, Code Review

WORK EXPERIENCE

Turbot HQ, Inc. Remote

August 2022 – April 2026

Software Engineer I

- Core contributor across Steampipe, Powerpipe, Flowpipe, and Tailpipe with 120+ merged pull requests and 9,300+ combined GitHub stars, building and shipping customer-facing product features from idea to production.
- Designed and developed a secure REST API microservice in **Go** (Gin), implemented OAuth 2.0 via Auth0, containerized with **Docker**, deployed on **AWS EC2**, and integrated as a gRPC client with internal services.
- Built a Kafka-based event-driven pipeline with asynchronous consumers and dead-letter queue handling for policy-enforcement workflows, improving reliability and operability in production.
- Engineered high-volume data-processing features in Tailpipe (**Go** + DuckDB + Parquet), improving throughput by 30% to 1,000+ logs/second and preventing out-of-memory failures through memory-safe processing changes.
- Kept release and **CI pipelines** current by adding multi-distro Linux smoke tests in GitHub Actions and owning release workflows across four **Go** CLIs.
- Debugged and resolved **production issues**, including a Kubernetes CrashLoopBackOff incident, by tracing root causes via pod and service diagnostics and restoring service availability.

Kredey (Kredey Innovations Pvt. Ltd.)

2021

Full-Stack Website Developer (Intern)

- Used Elasticsearch to support full-text and semantic search over a **NoSQL** Firebase-backed document-sharing platform.

PROJECTS

Lila Tic-Tac-Toe — Real-Time Multiplayer Game (2026)

Built and shipped an end-to-end product in 4 days with React + **TypeScript** frontend and a server-authoritative **Go**-based Nakama backend, including matchmaking, real-time game state, reconnect handling, and leaderboard features.

[repo/live](#)

TODO / Tasks REST API (Apr 2026)

Built an API-first backend in **TypeScript** with Bun, Express.js, SQLite, Zod, and JWT auth, including RBAC, migration-based schema management, and tested CRUD endpoints with proper REST status handling.

EDUCATION

University of Engineering & Management (UEM) Kolkata, WB, IN

August 2019 – May 2023

Bachelor of Technology in Computer Science and Engineering

CGPA: 9.28

Relevant Coursework: Object-Oriented Programming, DBMS, Data Structures and Algorithms, Shell Scripting in Linux, Low-Level Design, High-Level Design
