SUMMARY

Accomplished Technology Controls Advisory Analyst with 3.5+ years of experience in internal control **risk assessment**, **SOX 404/internal audit** support, **IT General Controls (ITGC/GITC)**, and **IT/OT audits**. At PwC India and EY India, improved client security posture by up to 40% and reduced compliance gaps by 30% through control testing, risk reporting, and remediation planning.

TECHNICAL SKILLS

Technology Controls & Audit: Internal Control Risk Assessment, SOX 404, Internal Audit, IT General Controls (ITGC/GITC), IT Audit, OT Audit, Regulatory Compliance

Risk, Controls & Standards: Risk Assessment, Maturity Assessment, Compliance Gap Assessment, ISO/IEC 27001:2022, NIST CSF 2.0, IEC 62443, ISO 27701:2025 (PIMS)

Tools, Reporting & Communication: Claroty, Nozomi Networks, Tenable, Wireshark, Power BI, MS Office (Excel, Word, PowerPoint), Stakeholder Communication

WORK EXPERIENCE

Ernst & Young (EY) India India (Hybrid)

March 2026 - Present

Consultant

- Performed technology-risk and internal-control assessments aligned with NIST CSF, **IEC 62443**, and **ISO/IEC 27001:2022** to strengthen control effectiveness and compliance readiness.
- Supported **SOX 404** and **internal audit** activities by evaluating IT/OT controls, documenting test evidence, and recommending remediation for control gaps.
- Assessed OT network switches, firewalls, and architecture, then redesigned Purdue-model network diagrams to improve segmentation and defense-in-depth.
- Collaborated with IT, cybersecurity, network, and infrastructure teams and provided periodic status updates to ensure timely closure of risk and audit deliverables.

PwC India (PricewaterhouseCoopers) Kolkata, West Bengal, India (Hybrid)

January 2023 - March 2026

Cybersecurity Associate (Associate II)

- Conducted IT and OT cybersecurity audits, including IT General Controls (ITGC) testing, against ISO 27001:2022 and **NIST CSF 2.0**, delivering maturity assessments and risk reports that improved client security posture by up to 40%.
- Developed policies, procedures, and As-Is/To-Be network diagrams aligned with regulatory standards, reducing compliance gaps by 30%.
- Used Claroty, Nozomi Networks, Wireshark, and Tenable to identify vulnerabilities, assess risk, and support remediation in industrial OT environments, cutting critical vulnerabilities by 25%.
- Created **Power BI** dashboards for vulnerabilities and control gaps and prepared management reports that improved stakeholder decision-making.
- Executed on-site ISO 27001:2022 IT/OT assessments for a steel manufacturer, producing gap reports and risk registers that enabled successful certification and reduced OT-environment risks by 35%.

PROJECTS

ISO 27001:2022 IT/OT Assessment - Steel Manufacturer (2023 - 2026)

Client engagement at PwC India

Conducted on-site ISO 27001:2022 IT/OT assessments; delivered gap reports, risk registers, and dashboards that enabled successful certification and reduced OT-environment risks by 35%.

NIST + IEC 62443 OT Cybersecurity Audit - Cement Manufacturer (2023 - 2026)

Client engagement at PwC India

Conducted NIST (SP 800-30/SP 800-53) and **IEC 62443** based **IT/OT audits**; delivered risk and gap registers, dashboards, and To-Be network architecture recommendations that reduced identified risks by 30%.

EDUCATION

B.P. Poddar Institute of Management and Technology (BPPIMT) Kolkata, WB, IN

August 2019 - June 2023

Bachelor of Technology in Electronics and Communication Engineering

GPA: 9.17
