SUMMARY

Accomplished **OT Security** Specialist with 3.5+ years of experience and expertise in OT/ICS cybersecurity, ISA/IEC 62443, IT/OT security governance, and regulatory compliance. Certified **ISO 27001:2022** Lead Implementer and **Claroty** Implementation Engineer (CIE 401), improved clients' **OT security** posture by up to 40% through comprehensive IT/OT cybersecurity audits at PwC India across steel, cement, and electrical manufacturing environments.

TECHNICAL SKILLS

OT / ICS Security: OT/ICS Cybersecurity, Industrial Control Systems (ICS), OT SOC Monitoring, OT Network Security, Firewalls, Penetration Testing

Frameworks & Standards: ISA/IEC 62443, ISO/IEC 27001:2022, ISO 27701:2025 (PIMS), NIST CSF 2.0, NIST SP 800-53, ISO 22301 (BCMS), GDPR

Security & Assessment Tools: Claroty, Nozomi Networks, Microsoft Sentinel, Defender for IoT, Lansweeper, Tenable, Wireshark, Burp Suite

Risk, Audit & Compliance: IT/OT Security Assessment, OT Security Governance, OT Audit, ISMS Audit, Vulnerability Assessment (VA/PT), Risk Assessment, Maturity Assessment, Regulatory Compliance, Policy Development, Power BI Dashboards, Network Diagrams

CERTIFICATIONS

- ISO/IEC 27001:2022 Lead Implementer (LI) (2023)
- Business Continuity Management System (BCMS) — ISO 22301 (2023)
- Claroty Implementation Engineer (CIE 401) — Claroty (2023)

WORK EXPERIENCE

Ernst & Young (EY) India India (Hybrid)
Consultant

March 2026 – Present

- Delivered **OT security** recommendations aligned with **NIST CSF**, **IEC 62443**, and ISO/IEC 27001:2022 to strengthen industrial **cybersecurity** posture, improve **compliance** readiness, and support the organization in achieving regulatory alignment across operational technology environments.
- Assessed OT network switches, **firewalls**, and overall network architecture to identify security gaps, evaluate existing controls, and recommend targeted remediation measures to enhance network resilience and reduce attack surface.
- Redesigned OT network architecture by developing revised **network diagrams** aligned with the Purdue Enterprise Reference Architecture (**Purdue Model**) to improve **network segmentation**, enforce **defense-in-depth** principles, and ensure secure IT-OT interfaces.
- Collaborated closely with IT, **cybersecurity**, network, and infrastructure teams to support cross-functional **OT security** initiatives and ensure secure integration between IT and OT environments across client engagements.
- Delivered data privacy and protection advisory services for a telecommunications client, applying **ISO 27701:2025** (**PIMS**), **GDPR**, and Bangladesh's PDPA/NDMA regulations; conducted **PIMS** gap assessments, Data Protection Impact Assessments (**DPIA**), and developed data flow diagrams and Records of Processing Activities (**ROPA**).
- Contributed to business development by drafting client proposals and responding to RFPs for prospective **OT security**, **cybersecurity governance**, and data privacy engagements across multiple industry verticals.

Cybersecurity Associate (Associate II)

- Conducted IT and **OT cybersecurity** audits and **governance** assessments using **ISA/IEC 62443**, **ISO 27001:2022**, and **NIST CSF 2.0**, delivering **OT security** maturity assessments, risk reports, and actionable recommendations that improved clients' **security posture** by up to 40%.
- Developed **OT security policies, procedures**, and **network diagrams** (As-Is / To-Be) aligned with regulatory standards, reducing **compliance** gaps by 30%; created **Power BI** dashboards to visualize OT vulnerabilities and supported clients in **ISO certification** readiness.
- Used **OT security** tools including **Claroty**, **Nozomi Networks**, **Wireshark**, and **Tenable** for **vulnerability assessment (VA/PT)** and risk remediation across industrial OT environments, cutting critical vulnerabilities by 25%.
- Performed **OT SOC** monitoring using Microsoft **Sentinel**, **Defender for IoT**, and **Lansweeper** to detect threats, track OT assets, and maintain continuous security visibility across industrial environments.
- Led **ISA/IEC 62443 OT cybersecurity** audit for a cement manufacturer — created **compliance** dashboards, risk registers, and **network diagrams** for a To-Be **OT security** architecture, resulting in a 30% reduction in identified risks.
- Conducted on-site **ISO 27001:2022 IT/OT** assessment for a steel manufacturer — developed gap reports, risk registers, and dashboards, enabling successful certification and reducing OT-environment risks by 35%.

EDUCATION

B.P. Poddar Institute of Management and Technology (BPPIMT) Kolkata, WB, IN

August 2019 – June 2023

Bachelor of Technology in Electronics and Communication Engineering

GPA: 9.17
